Vehicle regulations are constantly changing... are you sure you're up to speed?

InterRegs helps you keep up with regulatory changes in an easily accessible and cost-effective way, allowing you to use your technical resources more efficiently during the product development cycle.

- The volatility of regulations means that in an average year more than 30% of the regulatory information InterRegs provides, changes as a result of government amendments, proposals or new issues - we keep track of it all for you.
- InterRegs provides an online library of global vehicle safety and emissions regulations, which are up-to-date, consolidated and translated into English; saving you time and money searching, checking and translating the information for yourself.
- InterRegs has extensive coverage with a regulations database of more than 3000 documents in over 40 markets, giving you global coverage.

- All regulations and illustrations are published in English, and updated and consolidated to include any new, amended or proposed regulations making it easy for you to find what you need.
- The regulations are organised in a consistent format throughout, and are accessible via user-friendly menus which can be tailored to users' preferences enabling you to find the documents you require immediately.
- InterRegs covers technical regulations on safety, emissions and the environment for the automotive, commercial vehicle, off-highway and engine manufacturing industries giving you the flexibility to subscribe by country or subject, depending on your requirements.

Established in 1963, InterRegs is an invaluable aid to vehicle engineers involved in the planning and design phases of vehicle programs i.e. design, engineering, homologation, R&D, testing, certification and type-approval.

As the premier provider of regulations for the majority of OEMs, Tier 1 and Tier 2 suppliers worldwide, InterRegs can help YOU save time and money keeping up with ever changing regulations.

InterRegs also sponsors the SAE/ InterRegs Standards & Regulations Award for Young Engineers, established by InterRegs in 2001 in conjunction with the SAE Foundation.

InterRegs are ISO 9001:2000 accredited by Lloyd's Register Quality Assurance.

InterRegs is an online resource for international vehicle safety and emissions regulations, covering many countries including USA, UN ECE and the European Union. Visit www.interregs.net/trial to see how InterRegs.NET will work for you.

InterRegs.NET

InterRegs.NET is an online subscription service, offering immediate access to global vehicle regulations - it is a fast and easy way to source up-to-date regulations from your own web browser, using any computer, anywhere in the world, at any time.

- Single-user, multi-user and corporate subscription options are available - users can access InterRegs.NET from any computer with internet access, on-site or off-site.

- Includes a powerful full-text search engine with document hit-highlighting, and provides a detailed log of new and updated regulatory documents with information on what has changed, plus a full document archive.
- Ability to bookmark any frequently viewed regulations for easy access, links to recently viewed documents plus other user-preference functionality.

Global Automotive Regulations Online

InterRegs.NET contains global automotive construction and use regulations for over 40 countries and subjects including European Union (EC Directives), United Nations' Economic Commission for Europe (ECE Regulations), Global Technical Regulations (GTRs), US Federal (FMVSS), US States, China, Canada (CMVSS), Australia (ADRs), Emissions, Lighting, Braking and more.

These regulations cover all areas of vehicle manufacture for passenger cars, motorcycles, coach and bus, trucks, vans and trailers.

All text, tables and illustrations as published by the relevant national government authorities are included. We do not interpret, summarise, cut or re-word any regulation.

This service features InterRegs Legislation Implementation Dates database (LID), which provides all the essential implementation dates relating to when new or revised European EC and ECE regulations come into effect.

Off-Highway Construction Equipment Regulations

International and European standards, regulations and proposals for the manufacture of mobile construction or off-highway construction equipment including essential European Union (EC) Health and Safety requirements for compliance with the Machinery Directive (CE Marking), plus their supporting documents.

Includes over 300 standards and covers mobile machinery including earth-moving machines, materials handling machines, industrial and forklift trucks and agricultural and forestry tractors.

Non-Road Engine Emission Regulations

Regulations and proposals on the control of gaseous and particulate emissions, from new and in-use spark-ignition and compression-ignition engines, covering USA, California, European Union (EC) and UN Economic Commission for Europe (ECE).

Includes USA and USA Reference Documents (40 CFR), California Emission Control (CCR 13) and covers non-road engines including those manufactured for use in construction equipment, mobile and portable machinery, marine engines, garden machinery, generators, recreational vehicles and locomotives.
