

Fitch Solutions Bank Fundamental Financial Data

The world's most comprehensive bank financial data set

Fitch Solutions Bank Fundamental Financial Data provides accurate and timely financials on tens of thousands of institutions globally.

Save time compiling data as you leverage a world of information across and beyond the rated universe. Fitch Solutions Bank Fundamental Financial Data is used and checked by Fitch Ratings analysts, along with the world's leading banks and financial institutions, to identify risk indicators across developed and emerging markets.

Key Highlights

Peer comparability

Conduct global peer and cross-border analysis with standardized financial data and profiles on more than 36,000 private and public banks across 200 countries and territories. Access up to 35 years' of historical financial data standardized across currencies, local accounting standards and reporting frequencies, using our universal reporting template. We also supply corporate hierarchy information for our active universe of 19,000 banks.

High quality, timely and accurate

Perform critical bank and peer analysis with data offering a 99.95% accuracy rate that has been put through a rigorous data integrity process to identify any defects, including > 160 validation checks, >40 of which are run daily, independent audit sampling and root cause analysis. New filings are updated within days for timely credit intelligence.

In-depth financial statements

Analyze data at a granular level. Data records include up to 500 data points per bank, 55 pre-calculated ratios including key regulatory ratios such as the Basel III Leverage Ratio, Liquidity Coverage Ratio and Net Stable Funding Ratio, and source filings.

Transparency & expertise

We offer complete transparency on our data collection and standardization methodologies, with access to our data experts for further explanations whenever required.

A Trusted Provider of Credit Intelligence:

Fitch Solutions has a global, multi-lingual team who work around the clock to manually collect and translate statements sourced directly from regulatory bodies and financial institutions. All data is subject to a targeted data validation process to ensure it is of the highest quality before it ever reaches the Fitch Connect platform.

Data Capture & Integrity Review

Data is compiled by a global, multi-lingual team who collect and translate financial statements. A Data Input Analyst and Data Control Reviewer perform a two-stage review, and conduct over 160+ validation tests on all bank data within a standardized template.

Daily Validation Reports

Over 40 statement and entity level data validation reports (DVRs) are run daily, to review and identify any operational and data point anomalies.

Independent Audit Sampling & Targeted Data Checking

An independent group stringently compares sample data against financial statements, and checks specific countries' accounting standards or disclosure policies.

Root Cause Analysis

Root Cause Analysis is undertaken (when necessary) to identify any underlying reason for defects found in the data and to improve the business processes.

Leading Source for Global Fundamental Financial Data

Related Products

Gain a holistic view of risk by harnessing the power of Fitch's collective bank credit information - fundamental financial data, ratings and research - in one comprehensive platform, Fitch Connect. Fitch Connect is the powerful and intuitive platform that enables management of credit risk with greater efficiency, clarity and ease.

Research

Independent credit research and market commentary from industry and regional specialists who assess the health of banks across the world's capital markets. Fitch Ratings analysts are available to discuss the credit ratings, sources and methodologies behind their analysis with clients.

Ratings

The entire Fitch Ratings universe of current and historical bank credit ratings, including the Viability Rating, which expresses Fitch Ratings view of a bank's intrinsic creditworthiness, and the Support Rating that reflects the agency's view on the likelihood that a bank will receive external support to prevent it from defaulting.

Bank Scorecard

Leverage the financial information for over 36,000 banks, pulled into a format that allows you to make your own assessment and adjustments to credit scores, based on Fitch Ratings trusted methodology. This easy to use tool allows you to have instant access to information critical to your decision making, information that would otherwise take a week to compile.

Financial Implied Credit Scores

Get an accurate, standardized view of credit risk across a universe of 25,000 rated and unrated banks. Get more context on a credit score as you see how close banks with the same score are to the boundaries of the next rating category, for more solid credit risk decision making.

Fitch Connect News

Cut through the noise and connect with the stories that matter using our credit focused media curation and evaluation tool for banks and sovereigns. The tool uses machine-learned named-entity recognition and cutting-edge natural language processing techniques to scan through countless multilingual articles from over 2000 credible international, national and trade news sources. Each article is assigned a sentiment score ranging from positive to negative on a colour graded scale, so you can see at a glance what the article relates to and its potential impact on credit risk decisions.

Cross-sector Content

In addition to offering comprehensive financial data on all types of banks, Fitch Solutions Fundamental Financial Data is the world's most comprehensive source of insurance financial data in the market, as well as sovereign economic data and financials on corporates.

Sovereigns

Leverage current and historical economic data and 3-year forecasts on 117 sovereigns.

Insurers

Access over 12,500 life and non-life insurers, composites, Lloyds syndicates and brokers in over 150 countries with summary financial data presented in a global standardized format. Analyze in-depth data covering up to 500 data points, including raw data, off-balance sheet, and specific items that are consistent across life, non-life and composite firms.

Corporates

Analyze financial data on over 3,000 Fitch rated corporates in over 90 countries across 19 sectors.

FitchConnect

Content Delivery

A cutting-edge, multi-channel technology platform that delivers our data, research and tools in a way that ideally matches your current systems and workflows.

Instantly get the information you need in a usable format. Reduce days of work to minutes and reduce the risks of manual data handling errors.

Web

Our web portal offers a user-friendly way to explore and work with our data and analytical tools. Search, review standardized entries for companies and countries, build portfolios, create alerts, use dashboards and create adjusted data fields.

Excel Add-In

Pull our data and handy analytical metrics such as CDS Implied Credit Scores and Financial Implied Credit Scores into Excel. Use pre-built templates, such as Bank Scorecard or custom-built templates that match your workflow to cut down the time you spend calculating and increase the time you dedicate to critical credit risk decisions.

API & Feeds

Our Feeds and API channels integrate seamlessly with any third party or proprietary systems, allowing you to bring our data into a familiar environment and work with it alongside information from other sources. Feeds offers fundamental financial data on banks, insurance and sovereigns and with API you can also add corporates, financial implied credit scores and bank rankings into the mix.
