

thesify coauthor

More time for research.

AI agents that search, read, and draft — so you can focus on the science.

- LaTeX, Rich Text, and HTML

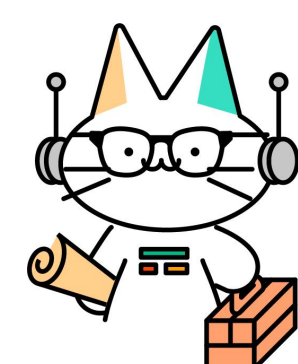

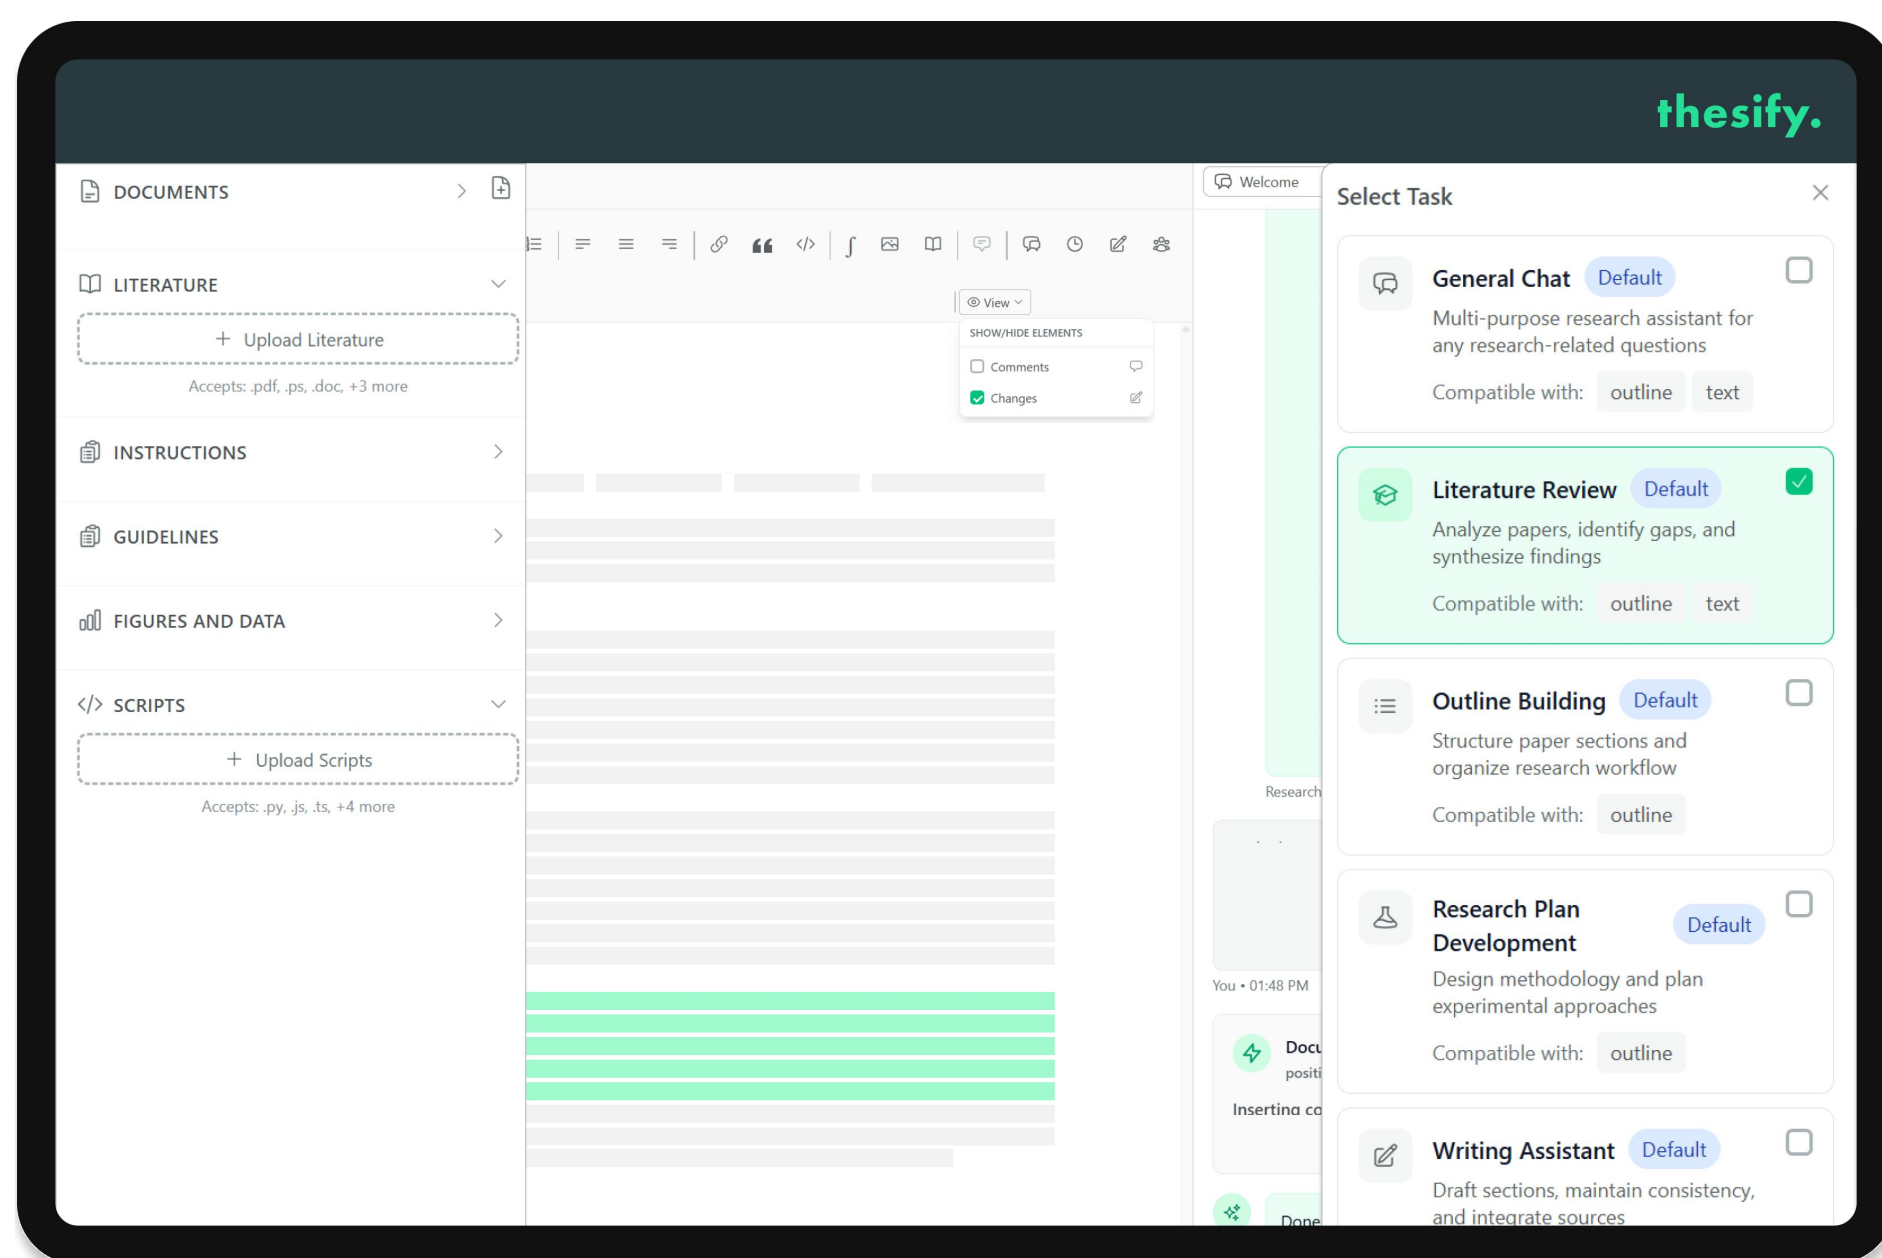

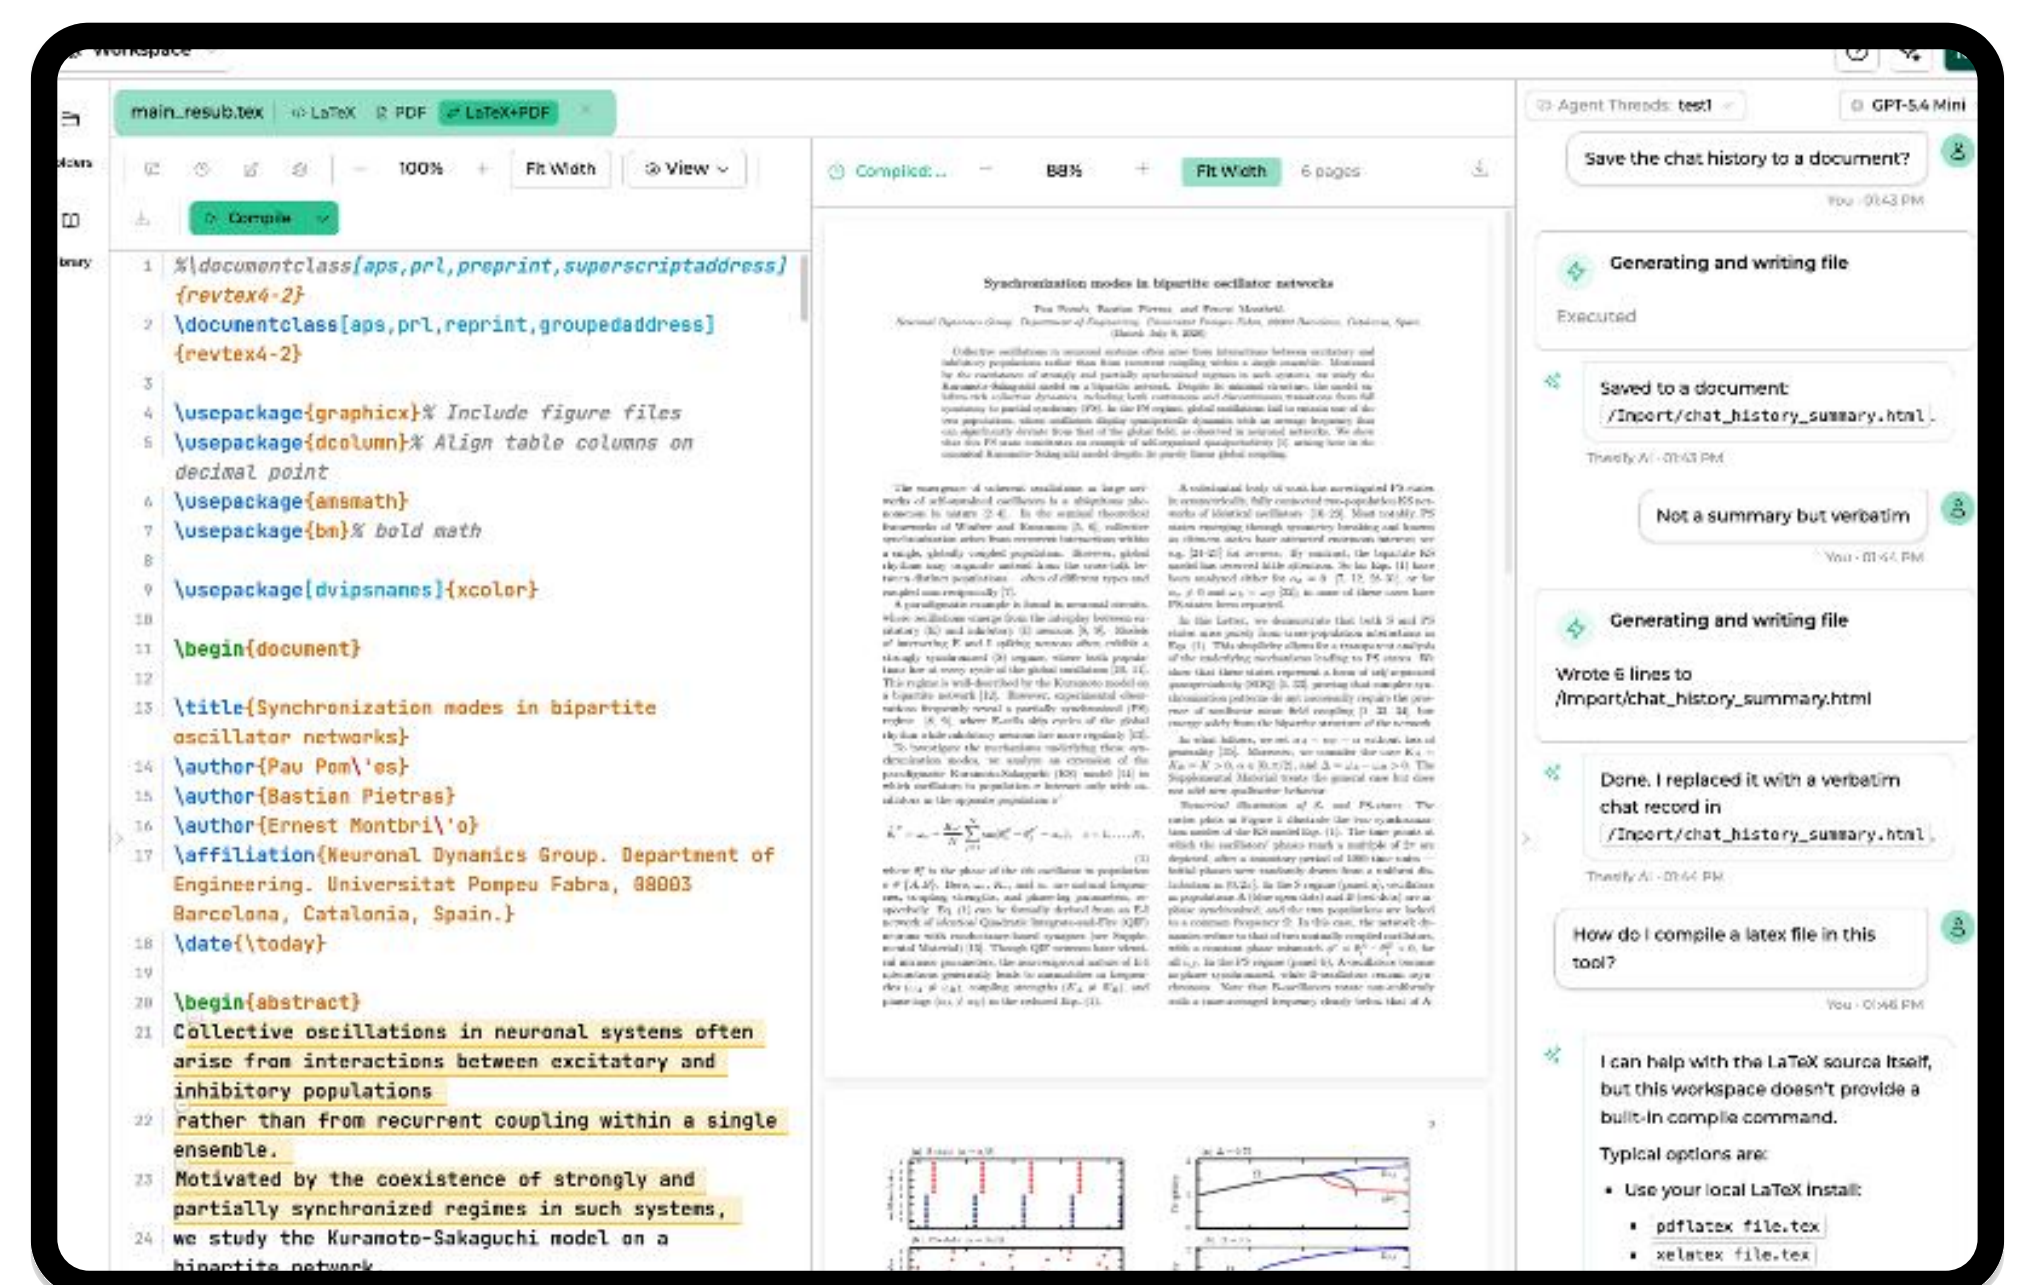

- Collaborative Authoring

- Full Authorship Attribution

Think Further

Coauthor doesn't generate text you'll never read. It helps you see your own work more clearly — strengthen arguments, spot gaps, refine what you actually want to say.

AI for your workflow

Define AI skills for how you actually research: brainstorm hypotheses, review literature, analyse structure, polish prose. You set the direction; Coauthor helps you get there.

Your ideas deserve co-authors,
not ghostwriters.

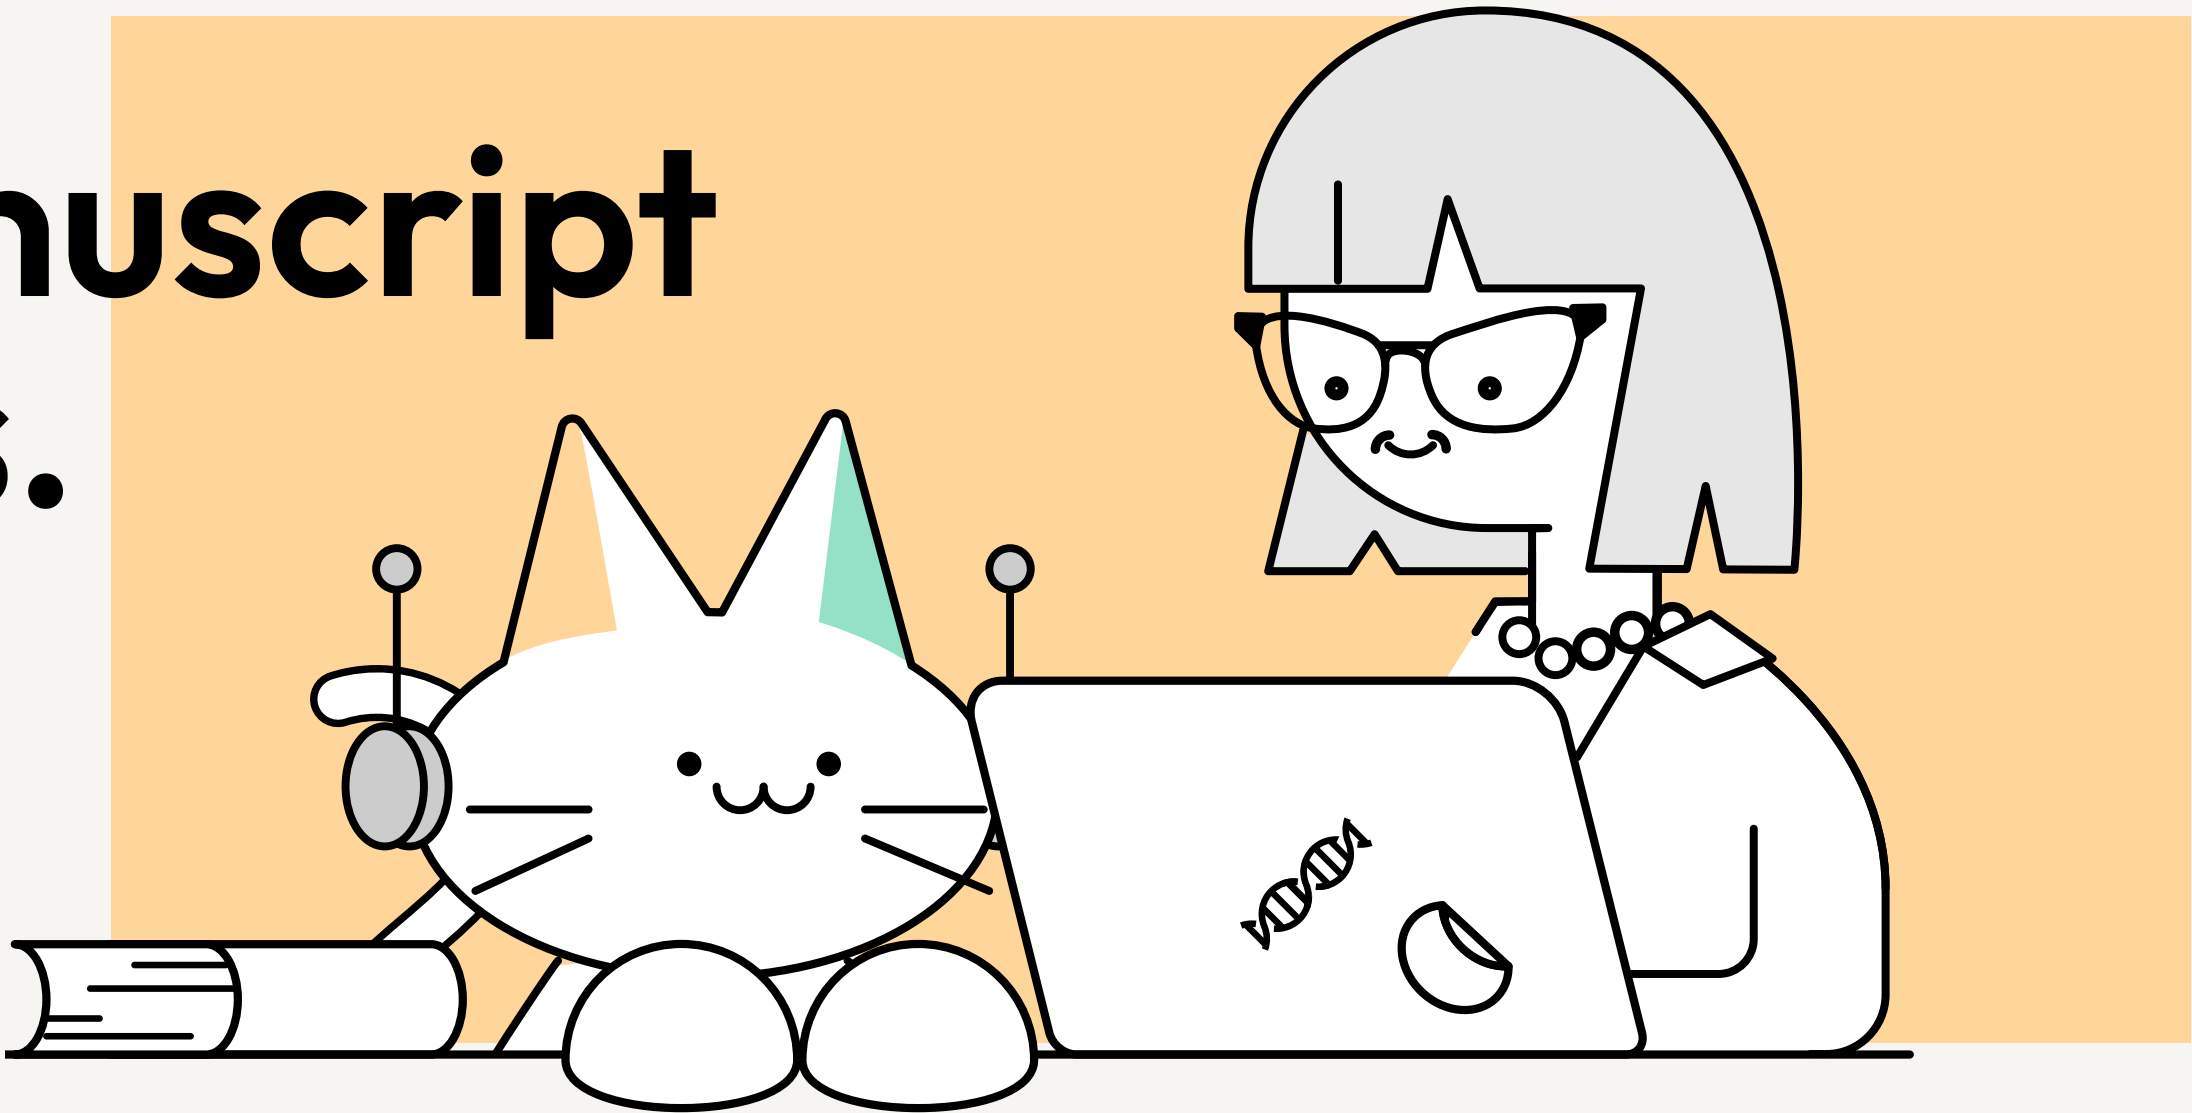

- ✓ Over 50,000 users from leading universities
- ✓ Made by scientists for scientists
- ✓ Swiss-made
- ✓ Secure and protected data

thesifyreviewer

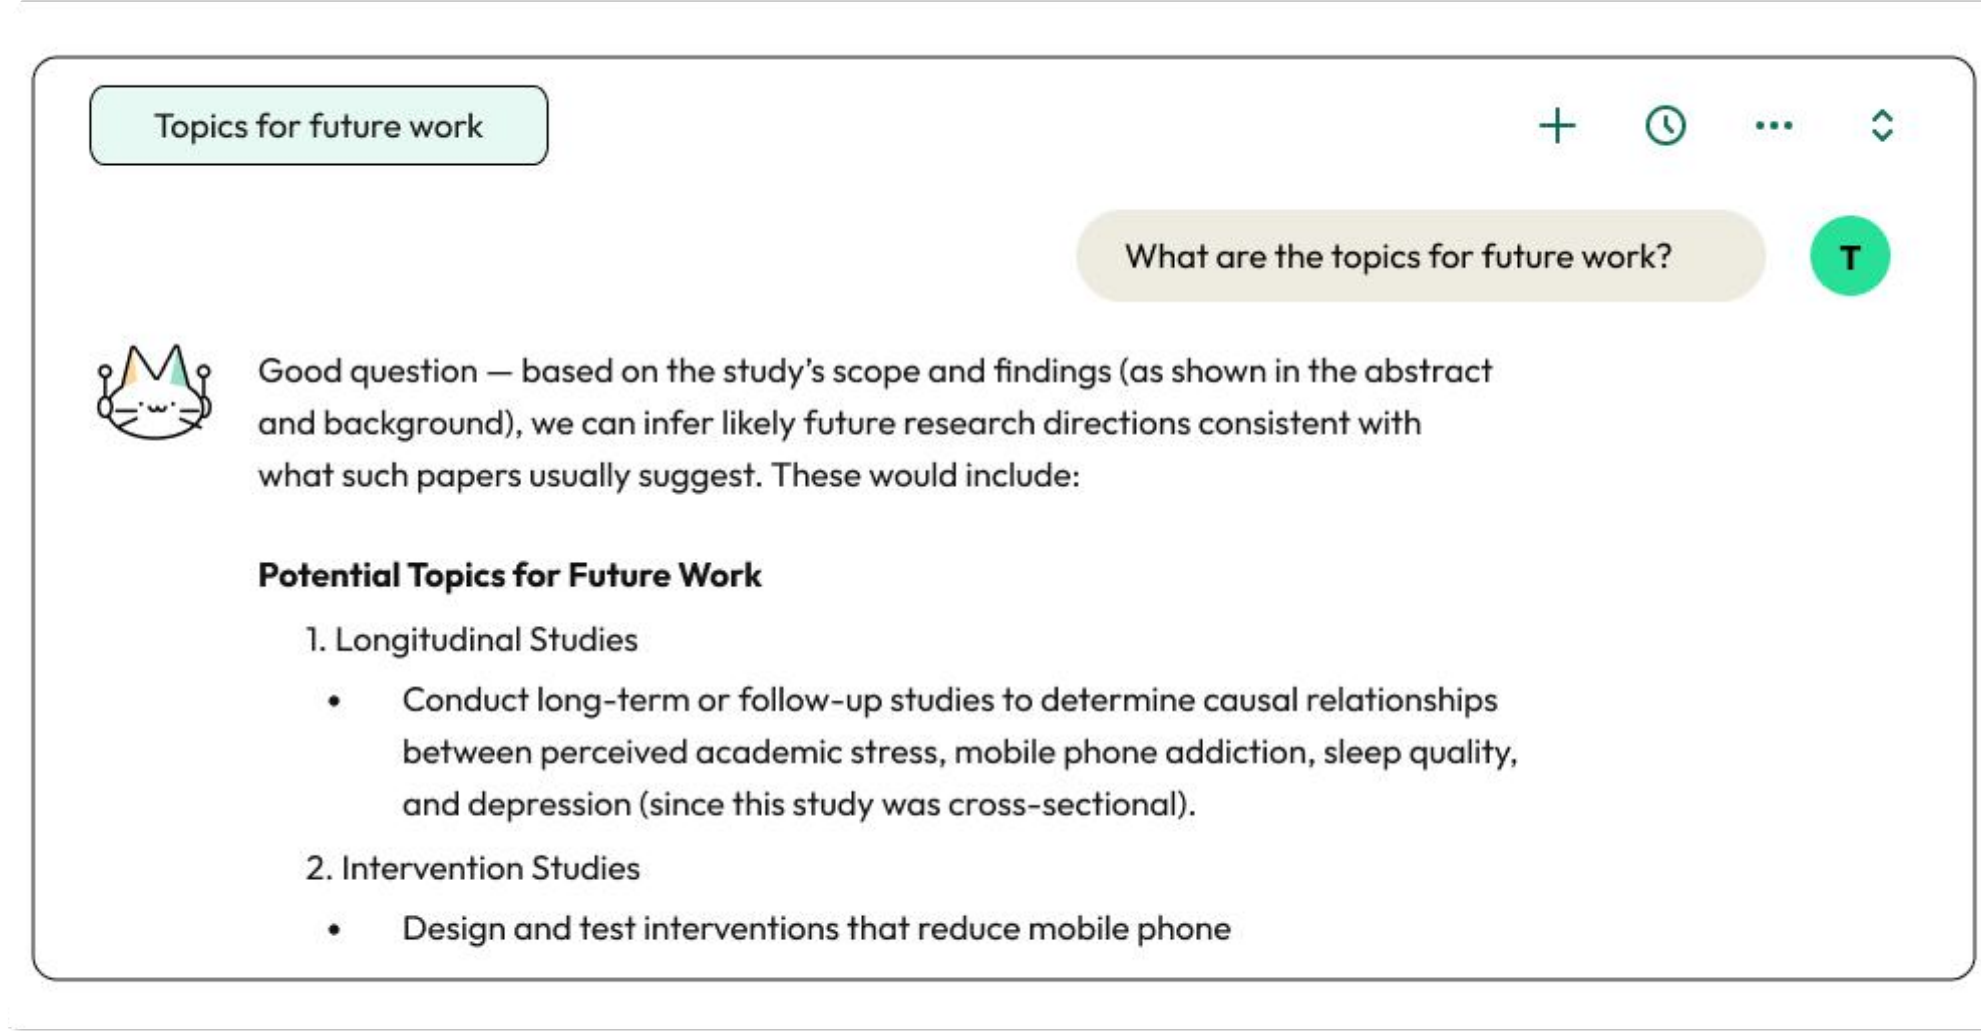

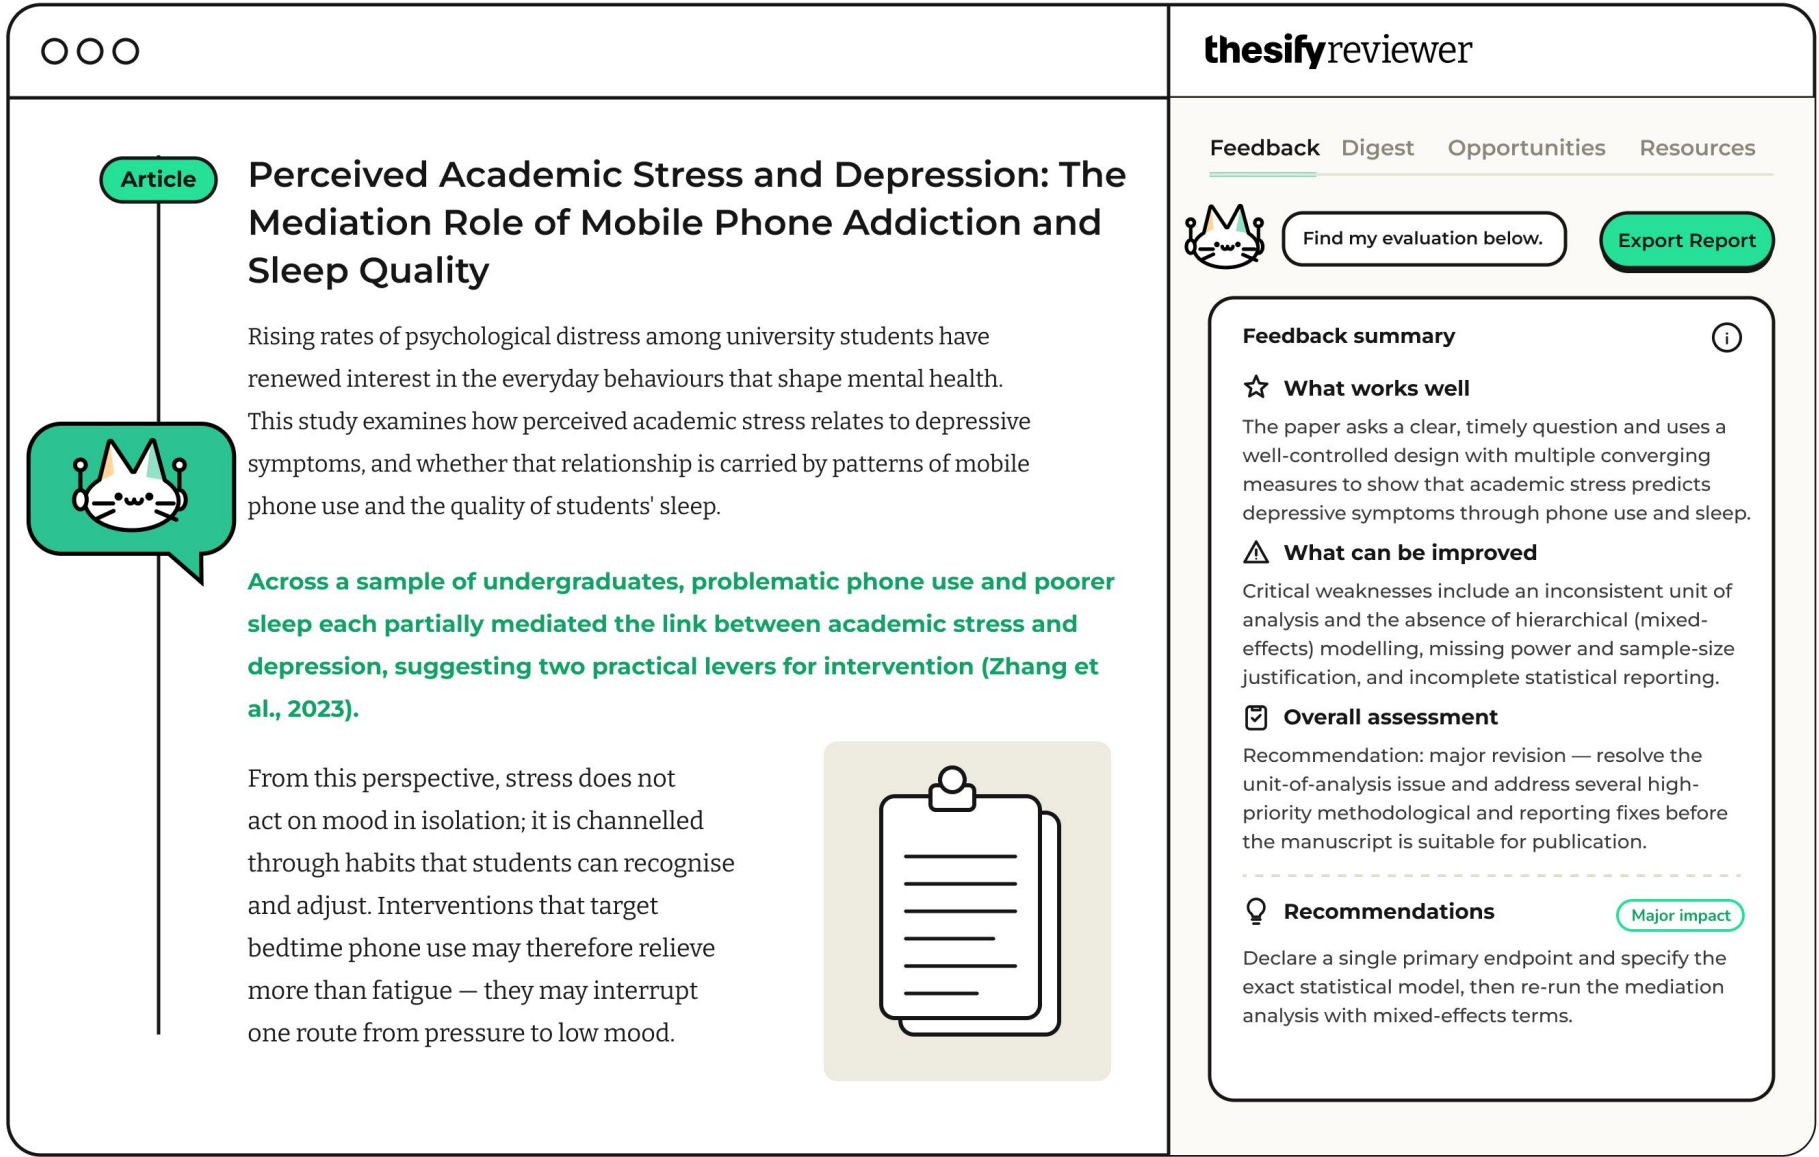

Pre-submission manuscript review for scientists.

Revise faster.
Get published sooner.

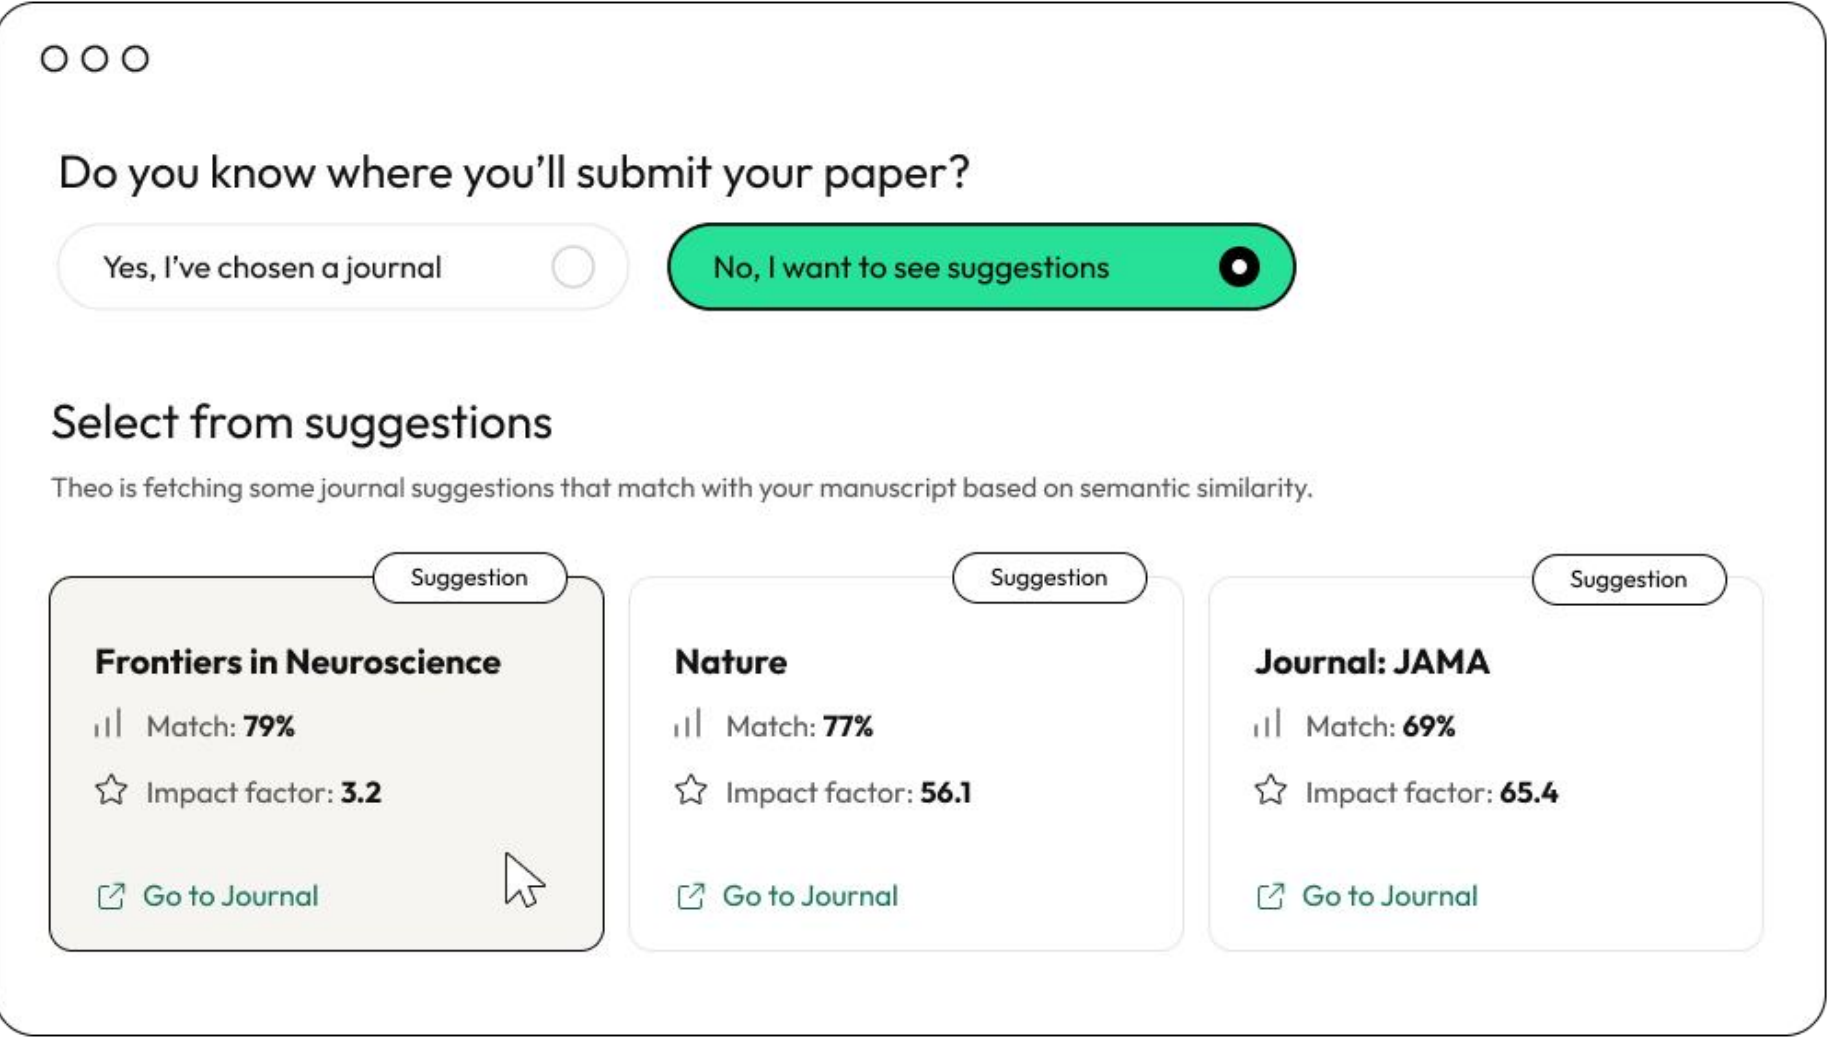

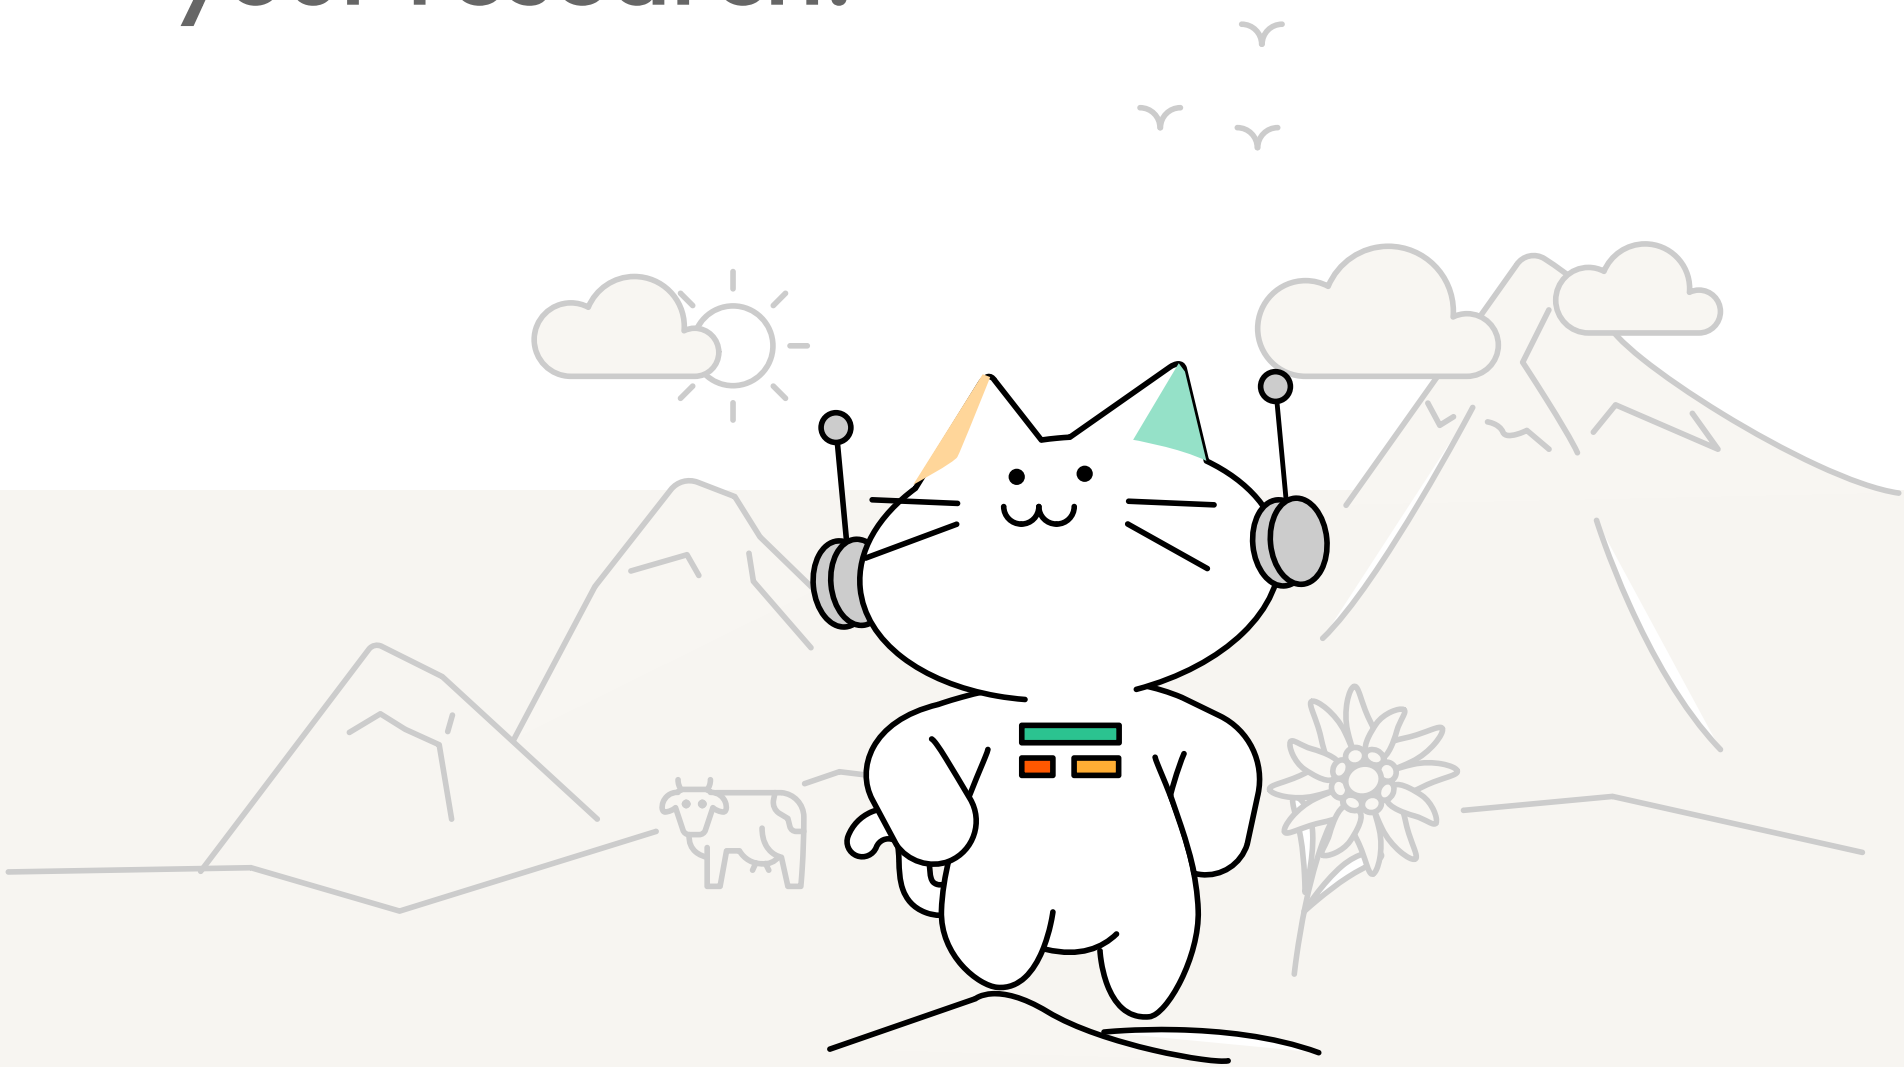

Pre-Submission Review

Get structured and get actionable feedback on your draft paper before you submit.

Journal Recommender

Find the best journal or conference for your research.
